Subject: Re: Hyperglycemia - URGENT

Hey Tim...I'm not sure exactly which materials you mean...the diabetes slides and letter are ready now (I was planning on sending them out after Patrizia does her BTV talk with the CRP's on Monday) and the GRD should be done in 7-10 days.

Tony and I have talked about the urgency around getting a sell sheet, training module and verbatim done.

We can work on this when he gets back on Tuesday.

Cheers,

Suni

Guys,

What is the status of the material.

Tim

Subject: Hyperglycemia - URGENT

Dear all,

Until now, this was a rather sleeping issue, but in the last 2 months, I've started to hear increasing noise about it - in Turkey as well in a very recent trip.

Can you please share with us our latest on that, and what's to come. Indeed the statement we've been given so far seem to become highly insufficient.

I sincerely believe that the reaction should be VERY global and VERY strong. If we let affiliates deal with that on a case by case basis, we're gonna be in trouble again.

Moreover, why for once wouldn't we dig for the dirty about our competitors, we're constantly on our heels.

Please advise

Regards
J

Subject: Welcome, just in time!

Dear Tony,

Welcome to the Global Zyprexa team, good luck!

I am the Zyprexa product Manger in Israel.

As you can see from the message below one of our O.L's arrived from a conference in the US with "disturbing" news about Zyprexa and Diabetes. I am going to meet him to find out where the info. is from but do you know of any major changes regarding the status of Zyprexa and Hyperglycaemia. Do you have any info regarding Risperidone and Hyperglycaemia?

Your new positon as "specialist in Hyperglycaemia issues" has come at a very good time!

Hoping you can help asap

ATB

Subject: Request from Prof Belmaker

Hi Nava

Prof Belmaker called me this morning and told me that he is very concerned about new information he received when he was in the States. He said that everyone is talking about Olanzapine causing Diabetes. He would like as much information as possible regarding this issue. Please let me know what you find.

Thanks and regards

Shirit
